

Endo Begins Shipment of Generic ZETIA®

December 12, 2016

DUBLIN, Dec. 12, 2016 /PRNewswire/ -- Endo International plc (NASDAQ / TSX: ENDP) announced today that one of its operating companies, Par Pharmaceutical, has begun shipping ezetimibe 10 mg tablets, the generic version of Merck's ZETIA®. Par Pharmaceutical is the marketer and distributor of the product in the U.S., and is entitled to Hatch-Waxman generic marketing exclusivity based on the first-to-file ANDA status of its licensing partners, Glenmark Pharmaceuticals, Inc., USA, with whom Par will share profits.

"We, along with our partners at Glenmark, are proud to be able to offer patients managing their cholesterol levels the first generic version of ZETIA®," said Tony Pera, President of Par Pharmaceutical. "Par remains committed to providing patients access to high quality and affordable medicines."

"Glenmark has a deep heritage of bringing safe, effective and affordable medicines to patients around the world," said Robert Matsuk, President of North America and Global API. "Our partnership with Endo to bring the first generic version of ZETIA® to market only underscores our joint commitment to bridging the gap between patients and the medicines they need most."

ZETIA® is indicated for use along with a healthy diet to reduce elevated LDL cholesterol in patients with hyperlipidemia.

According to IMS Health data, U.S. sales of ZETIA® are approximately \$2.614 billion for the 12 months ended September 30, 2016.

Important Safety Information

ZETIA is a prescription medicine and should not be taken by people who are allergic to any of its ingredients. ZETIA can be taken alone or with a statin. Statins should not be taken by women who are nursing or pregnant or who may become pregnant, or by anyone with liver problems. If you have ever had liver problems or are pregnant or nursing, your doctor will decide if ZETIA alone is right for you. Your doctor may do blood tests to check your liver before you start taking ZETIA with a statin and during treatment.

Unexplained muscle pain or weakness could be a sign of a rare but serious side effect and should be reported to your doctor right away. In clinical studies, patients reported few side effects while taking ZETIA. These included diarrhea, joint pains, and tiredness.
